Experience

Discrete Technologies

Jan 2003 - Present

Project #1

Client : Itron Inc, Spokane, WA
Role : PeopleSoft Technical Developer

PeopleSoft Technical Developer

As a part of PeopleSoft Human Resources Team, involved in development of PeopleSoft HRMS applications (HR, Benefits, Payroll) including *customization* of online objects as per the clients request to maintain human resource data. Extensively involved in writing *PeopleCode* to validate business rules. Also involved in PeopleSoft *Style Sheets*, which includes creating custom classes, as per the client requirement.

Accomplishments:

- As a team member of project involved in the *customization* of on-line panels, record definitions and menus using **Application Designer**.
- Extensively worked in the customization of **PeopleCode** to implement business rules and to validate the data entry.
- Used **Application Reviewer**, **PS Debugger** and **PS Trace/Debug** options to capture the errors on various PeopleCode and SQL code and *debug* them.
- Involved in creating **Users Profiles, Roles, Permission Lists** and assigned *User Profiles* to users (**Maintain Security**).
- Worked on **Process Scheduler** for running the *batch jobs* and used Process Monitor to monitor to view the status of reports.
- Attached newly created SQR and Crystal Reports under menu to run through Process Scheduler.
- Developed *reports* to present the Benefit information, Job Anniversary, Retired Employees, Terminated Employees information using **Crystal Reports**.
- Extensively used **Crystal Reports** to develop **ad-hoc** queries generate reports / analyzing reports using excel.
- Generated numerous **reports** that included writing of complex SQL for HR, Benefits Modules.
- Extensively worked in **PeopleSoft Style Sheets** and also customized **Style Sheet Classes** to create custom Style Sheets.
- Worked on interface programs using SQR and migrating data from database to database using **Data Mover**.
- Extensively worked on **Impact Analysis Tools** like PeopleTools Cross Reference Reports, Object Reference Reports and Record Cross Reference Utility.
